PDF - AGRICULTURAL FUNDING AS SOLUTION TO NIGERIA ECONOMY DIVERSIFICATION - researchcub.info

CHAPTER ONE INTRODUCTION

1.1 BACKGROUND TO THE STUDY

Nigeria is largest oil exportingcountry in Africa and has a rapidly growing economy. The country follows are source based growth strategy driven by the production and exporting of oil. With the volatility of global oil prices and often volatile growth of Nigeria's economy, the country has wasted much of its opportunities to break away fromunderdevelopment despite its massive natural and human resources endowments. It has dwelled only on its huge crude oil resources as the major source of revenue, driving a monolithic economy for years in spite of the enormous developmental challenges it faces (Ojo, 1994). Regrettably, the oil resourcesare being mismanaged and a substantial part of it has gone on rent seeking andred-tapism common in Nigerian bureaucracy. For more than a decade now, Nigeriahas been enjoying high levels of economic growth, human development, and relative political stability. As it continues along the path of economicprogress, it is imperative that the country finds ways to diversify its economyby boosting non-traditional sectors, expanding its range of products for exports and engaging new economic and trade partners. The economic nerve centreof Africa shifted northward this year when Nigeria took South Africa'slong-held position as the country with the continent's largest Gross DomesticProduct (GDP). While GDP neither reflects the wealth distribution nor accountsfor the size of the population, it is a significant indication of Nigeria's emerging economic power. If these growing resources are invested intelligently, the country can benefit and exceed the International Money Fund's estimated GDP growth of seven per cent. As a matter of priority, Nigeria government mustencourage the diversification of Nigeria's economy (Jonathan, 2013). It is theonly viable way to survive the current environment of global economicuncertainty with the volatility of oil price. It is crucial that government donot believe that oil provides an endless source of revenue.

At the advent of democracy in1999, Obasanjo's first full national budget in 2000 was under N600bn naira butnow we have as much as 800% increase over this, yet we can only see littledevelopment but surplus of preaching's and governance by billboards whilevision 20-

2020 is in a state of rest like Newton's first law of thermodynamics. We say unequivocally that resource looting and wastage is much concentrated at the state levels, because most of our Governors are not just most wanting butproblematic and the very impediment to development.

Diversification presents the mostcompetitive and strategic option for Nigeria in light of her developmental challenges and given her background. Diversification has a lot of benefits for Nigeria to maximally utilize her abundant resource – base to rebuild the economy and enjoy the benefits of all the linkages, synergy, economies of scale, grow national technology and foreign investment profile, build humancapital, exploit new opportunities, lessen averagely operational costs, increase national competitiveness and grow the standard of living and confidence of the citizens for national renaissance.

Diversification does not occur ina vacuum. And, the need to have in place an enabling environment to makediversification possible remains necessary. A number of key drivers havealready been identified. Agriculture was the main stay of the Nigeria economybefore the discovery of crude oil in 1956. Adequate funding of agriculturewillbe an appropriate option in the diversification of the nation's economy.

Diversification implies "movementinto new fields and stimulation and expansion of existing traditionalproducts." Diversification does not discourage specialization, but requiresthat resources be channeled into the best alternative uses (Iniodu, 1995). Inmacroeconomic planning, diversification promotes growth and development through the mobilization of savings from surplus sectors for use in the development of deficit sectors of the economy.

1.2 STATEMENT OF THE PROBLEM

Options for diversifyinganeconomy abound, such as agriculture, entertainment, financial services, industrialization, information and communication technology, tourism, mining, etc. However, it is worthy to note that country-specific circumstances ought to as a matter of necessity, be considered. This is cogent, since due to structural differences, a model that fits an economy perfectly well may prove irrelevant another. With a major objective of diversifying the productive base of the Nigerianeconomy with a view to reducing dependence on the oil sector, this study zero in on 'agriculture' as imperatives. The choice of this approach is informed by Developmental Policy in Nigeria and the huge successes recorded

bysome Asian countries—which are collectively referred to as 'Asian Tigers'—inapplying these imperative, as well as the fact that these countries werebasically at the same level of national development with Nigeria, atthe time of their respective take-off and still share certain similarities with Nigeria. The effects of diversification in an economy (Eko, et al. 2013)

1.3 OBJECTIVES OF THE STUDY

The following are the objectives of this study:

1. To examine the benefits accruable from the diversification of the Nigerian economy.

2. Todetermine the prospects of agricultural funding in the diversification of the Nigerian economy.

3. Todetermine the contribution of agriculture in the growth and development of the Nigerianeconomy.

1.4 RESEARCH QUESTIONS

1. Whatare the benefits accruable from the diversification of the Nigerian economy?

2. Whatare the prospects of agricultural funding in the diversification of the Nigerian economy?

3. Whatis the contribution of agriculture in the growth and development of the Nigerian economy?

1.6 SIGNIFICANCE OF THE STUDY

The following are the significance of this study:

1. Theresults of this study will educate the general public on approaches by which agricultural funding can be used a s a tool for the diversification of the Nigerian economy.

2. This research will be a contribution to the body of literature in the area of the effect of personality trait on student's academic performance, thereby constituting the empirical literature for future research in the subject area.

1.7 SCOPE/LIMITATIONS OF THE STUDY

This study will cover the effect of agricultural funding on the diversification of the Nigerian economy.

LIMITATION OF STUDY

Financial constraint- Insufficient fund tends to impede the efficiency of the researcher in

sourcing for the relevant materials, literatureor information and in the process of data collection (internet, questionnaireand interview).

Time constraint- The researcher will simultaneouslyengage in this study with other academic work. This consequently will cut downon the time devoted for the research work

AGRICULTURAL FUNDING AS SOLUTION TO NIGERIA ECONOMY DIVERSIFICATION

The complete project material is available and ready for download. All what you need to do is to order for the complete material. The price for the material is NGN 3,000.00. Make payment via bank transfer to Bank: Guaranteed Trust Bank, Account name: Emi-Aware technology, Account Number: 0424875728

Bank: Zenith Bank, Account name: Emi-Aware technology, Account Number: 1222004869

or visit the website and pay online. For more info: Visit https://researchcub.info/payment-instruct.html

After payment send your depositor's name, amount paid, project topic, email address or your phone number (in which instructions will sent to you to download the material) to +234 70 6329 8784 via text message/ whatsapp or Email address: info@allprojectmaterials.com.

Once payment is confirmed, the material will be sent to you immediately.

It takes 5min to 30min to confirm and send the material to you.

For more project topics and materials visit: https://researchcub.info/ or For enquries:

info@allprojectmaterials.com or call/whatsapp: +234 70 6329 8784

Regards!!!
