

### **ABSTRACT**

*This research work was focused on investigation on the use of budgeting as a tool for planning and control in a manufacturing industry .*

*The objective of the study is to show the importance of budgeting as a tool for planning and control in operation of a manufacturing industry which has profit maximization as its principal objective. The research also aims at identifying the procedures adopted in the formulation of annual budgets in a manufacturing industry.*

*Based on this, the following hypothesis was formulated for the study. The hypothesis include:*

- 1. Managers use budgeting as a tool for planning and control in attaining the goals of the business.*
- 2. Decision-making is performed in a manufacturing industry using budgeting.*
- 3. Utilization of resource is achieved with the use of budgeting and budgetary control*

*Following the investigation and analysis of the data, the following findings were made:*

- 1. The organization uses budgeting in achieving their goals and objectives.*
- 2. The main objective of the organization is maximization of profit.*
- 3. Efficiency and effectiveness of the organization's operation is enhanced through the use of budgeting etc.*

*From the findings, the conclusion was arrived that budgeting is a very essential and indispensable tool for planning and control. It helps management to be well structured in sustaining the growth and expansion of the organization*
