

PDF - Computerised Contact Management System - researchcub.info

ABSTRACT

Contact management system deals with the collection and storage of contact information of people, addresses, phone numbers and other contact details. Computerized system poses high speed of processing precision, storage, its versatility and high retrieval system makes possible the completion of tasks that could never been achieved with manual system because of the difficulty of completing them on time for the results to be useful.

This paper discusses the design and implementation of a Contact Management system database application with SQLSERVER. It also discusses the issues of selecting appropriate database model, interface design, system deployment and maintenance. A projection of record growth in relation to student population and system requirement was carried out in the study. Finally it discusses the applicability of the system in academic institutions. The Programming language used in developing this application is Visual Basic.net 2012. It runs in Windows 98 to Latest windows 8. Also Crystalreport must be installed to view the report of contact.

TABLE OF CONTENT

Title
Abstract
Certificate

Table of Content

CHAPTER ONE

1.1 Introduction
1.2 Background of the Study
1.3 Statement of Problems
1.4 Objectives of the Study
1.5 Significance of the Study
1.6 Limitation of the Study
1.7 Scope of the Study
1.8 Assumption of the Study
1.9 Definition of Terms

CHAPTER TWO - Literature Review

2.1 What is Student Identification number?
2.2 Student Identification number by country
2.3 Personal Identification Information

CHAPTER THREE - Methodology and Analysis of the System

3.1 General description of the existing system
3.2 Fact finding methods used
3.3 Objective of the existing system
3.4 Organizational structure
3.5 Input analysis
3.6 Process analysis

- 3.7 Output analysis
- 3.8 Information flow diagram
- 3.9 Problems of the existing system

CHAPTER FOUR –Design and Implementation of a new system

- 4.1 Design standard
- 4.2 Output specification and design
- 4.3 Input design and specification
- 4.4 File design
- 4.5 System flow chart
- 4.6 System requirement
- 4.7 Hardware requirement
- 4.8 Software requirement
- 4.9 Program flow chart

CHAPTER FIVE

- 5.0 Summary
- 5.1 Conclusion
- 5.2 Recommendation
- 5.3 References
- 5.4 Appendices

CHAPTER ONE

INTRODUCTION:

This chapter gives an overview about the aim, objectives, background and operation environment of the system.

1.1 BACKGROUND OF THE STUDY

Contact Management system is applications which are generally small or medium in size. It is used for personal and business purposes to store contact details for reference purpose. With this computerized system there will be no loss of record or member record which generally happens when a non-computerized system is used. The system is made up of tab page such as welcome page, address book and report center. The address book is made up of the menu and the list view to view the contact details. The report center is made up of the address book, phone book, contact detail, and the contact list report.

1.2 STATEMENT OF THE PROBLEMS

Loss of contact was a big problem to people who have gotten the contact details but unfortunately the contact details got lost.

1.3 OBJECTIVE OF THE STUDY

The project aims and objectives that will be achieved after completion of this project are discussed in this subchapter. The aims and objectives are to resolve contact issue.

1.6 SIGNIFICANCE OF THE STUDY

The significance of this study was to help and give a benefit to the student, business marketers, school management, company, and other places that need this system. The system would improve the monitoring capacities of those who maintain the system.

1.7 LIMITATION OF THE STUDY

- 1.Unavailabilityof academic materials.
- 2.Transportproblem
- 3.Lackof financial support
- 4.Lackof Time
- 5.Unavailabilityof programming software such as Visual Basic.Net.

1.9SCOPE OF THE STUDY

This research workwill concentrate on the implementation of the system to see how it works andhow it can be used.

1.8 ASSUMPTION OF THE STUDY

During the process of datacollection, information relating to contact managementSystem was obtained from the internet and Microsoft accesscontact application. Hence, it is assumedthat all the data collected are correct and contains no false information.

Computerised Contact Management System

The complete project material is available and ready for download. All what you need to do is to order for the complete material. The price for the material is NGN 3,000.00.

Make payment via bank transfer to Bank: Guaranteed Trust Bank, Account name: Emi-Aware technology, Account Number: 0424875728

Bank: Zenith Bank, Account name: Emi-Aware technology, Account Number: 1222004869

or visit the website and pay online. For more info: Visit <https://researchcub.info/payment-instruct.html>

After payment send your depositor's name, amount paid, project topic, email address or your phone number (in which instructions will sent to you to download the material) to +234 70 6329 8784 via text message/ whatsapp or Email address: info@allprojectmaterials.com.

Once payment is confirmed, the material will be sent to you immediately.

It takes 5min to 30min to confirm and send the material to you.

For more project topics and materials visit: <https://researchcub.info/> or For enquiries: info@allprojectmaterials.com or call/whatsapp: +234 70 6329 8784

Regards!!!
