### 1.1 INTRODUCTION

#### INFLATION

Considering the high rate at which prices of goods and services increase in our society today I was moved to pick interest in finding out the causes the consequences, and if possible what should be done to control this social malady called inflation in Nigeria, there are certain ambiguity about the term inflation this because the work indeed has many usages in economic language as there are economists.

In ordinary speech, inflation is taken to mean a period of high price. But high price do not necessarily indicate the existence of inflation. This is because equilibrium of supply and demand for goods and services can be established at any level of prices and once equilibrium has been achieved inflation disappears.
