CHAPTER ONE

INTRODUCTION

BACKGROUND OF THE STUDY

Industrial **development** involves development of a technical arrangement that moves an economy from the traditional method of production to a more complex system of mass manufacturing of variety of goods of services involving technology and **management** techniques.

Industrialization tends to propel growth and quicken the achievement of structural transformation and diversification of economy. It enable a country to utilize it's factor endowments and depends less on external sector for its growth and **sustenance**.

They provide employment for a substantial proportion of the industrial establishment. Therefore, due to the above mentioned role played by industrial sector, that is small-scale industries in the economy it requires some financial support from government for the smooth running of the industries.
