

Fiscal ratios are detective, predictive, and informative tools that are used to assess the financial health of a company. They are used by investors, creditors, and other stakeholders to evaluate the company's performance and to make informed decisions. The most commonly used fiscal ratios are the current ratio, the debt-to-equity ratio, and the return on equity ratio. These ratios provide a comprehensive overview of a company's financial position and are essential for monitoring firm performance.

## **RATIO ANALYSIS AS A TOOL OF MONITORING FIRM PERFORMANCE**

The complete project material is available and ready for download. All what you need to do is to order for the complete material. The price for the material is NGN 3,000.00.
