INTRODUCTION

1.1 BACKGROUND OF THE STUDY

The goal or desire of any nation is to achieve its economic growth and development. For the Nigeria government, employment provision for all and reasonable development of all localities are certainly not feasible within the limited government structures and establishment. The federal government therefore considers the active participation of the private sector especially at the grass root as the most viable means of achieving the development and job provisions. Hence, in its second and third national development plan, the federal government adopted the policy of giving active

support to the promotion and development of small and medium enterprises on the country.

However, are would want to know what entrepreneurial development is all about.

According to some writers, especially in the written work of H. O. Amaechina “entrepreneurship concept of small business management”, entrepreneur. So defined as the willingness and ability of an individual to seek out investment opportunities, establish and run the enterprise successfully. Thus entrepreneurship is associated with different kinds of activities that has to do with the establishment and operation of business enterprises. Such activities may include;

Identification of investment opportunities.

Deciding what opportunities to [exploit for profit](#).

Promotion and establishment of the business enterprises.

Pooling of the various scarce resources needed for production and distribution of good and services.

Organisation and management of the human and material resources for the attainment of the objectives of the [enterprise](#), risk bearing and innovation.
