

STATE. - researchcub.info **ABSTRACT**

Agriculture has been the topmost priority of every successive administration Nigeria. This is due to the fact that the extent of development of a nation is also measured in terms of the quality and quantity of food available to her people. Though the struggle at improving food status has been on course before independence. It reminds us of 1959, when the western government granted agriculture land mark and sent a representative to Israel who brought the farm settlement scheme modeled after the Israel Mosheim. As a result other regional governments embraced the idea and established farm settlements in various parts of their region. But due to the discovery of crude oil that led to the temporary abandonment of primary production of food by the government there was a negative attitude toward farming and rapid pursuit of quick money led to drastic drop in production, therefore Nigeria started importing foods from developed countries which brought a great setback to the economy. The factor that led to the fall of farm facilities such as improper construction of residential, lack of maintenance and culture.

CHAPTER ONE

INTRODUCTION

Farm Settlement is modern village where building were erected for farmer with different infrastructural amenities such electricity, school, Hospital for purpose of agriculture. The board aim of farm settlement embraces all the productive occupations of man in which he works with nature in order to make his plant and animal grow better, so that they may products, which he harvests.

A farmer plants his crops at the beginning of the rainy season and lets them grow with the rains, but he may plant tree to check the force of the wind or build shed to protect his animals from harsh weather conditions, a farmer grows his plants and animals with the express purpose of harvesting them. It is clear from the above that any treatment of farming should including growing crops and rearing livestock.

1.1 BACKGROUND OF THE STUDY

Something called the farm settlement Revolution, was the world's first historically verifiable revolution in agriculture. It was the wide scale transition of many human cultures from a life style of hunting and gathering to one of agriculture and settlement which supported an increasingly large population.

However the revolution involved far more than the adoption of a limited set of food producing techniques during the next millennia it would transform the small and mobile groups of hunter gatherers that had hitherto dominate. Sedentary societies based in built up villages and towns, which radically modified their natural environment by means of specialized food crop cultivated (e.g. irrigation and food storage technologies that allowed expensive surplus food production.)

PROBLEMS OF STATE FACING FARM SETTLEMENT

There are many problems facing farm settlement today's world these problems include:

The migrations of young people which can leave the area in question with an ageing population, which can inflict harm on the area because the area can deteriorate without the input of new generations. Farm settlement.

In many farm settlement areas, there is very high dependence on agriculture most of the time as their main source of income and this can also be attributed to the low level of basic and manufacturing industry.

Finally a very important problem facing farm settlement is the lack of investment being put into these areas without investment many farms and businesses can die and this would leave the town community in an even worse state.

MOTIVATION

The motivation behind investment in research and development comes from a commitment to the development of a world leading, sustainable and profitable aquaculture industry injecting in as well as the families commitment to the social and economic welfare of their community significant contribution rural sector investment.

It refined packaging developing an innovation and successful.

FARM SETTLEMENT FOR IGOSUN COMMUNITY OYUN LOCAL GOVERNMENT IN KWARA STATE.

The complete project material is available and ready for download. All that you need to do is to

order for the complete material. The price for the material is NGN 3,000.00.

Make payment via bank transfer to Bank: Guaranteed Trust Bank, Account name: Emi-Aware technology, Account Number: 0424875728

Bank: Zenith Bank, Account name: Emi-Aware technology, Account Number: 1222004869

or visit the website and pay online. For more info: Visit <https://researchcub.info/payment-instruct.html>

After payment send your depositor's name, amount paid, project topic, email address or your phone number (in which instructions will sent to you to download the material) to +234 70 6329 8784 via text message/ whatsapp or Email address: info@allprojectmaterials.com.

Once payment is confirmed, the material will be sent to you immediately.

It takes 5min to 30min to confirm and send the material to you.

For more project topics and materials visit: <https://researchcub.info/> or For enquiries: info@allprojectmaterials.com or call/whatsapp: +234 70 6329 8784

Regards!!!
